Nationality: Indian | Visa: Dependent (Work Authorization Valid Until 2028) | UAE Driving License | Languages: English (Fluent), Hindi

PROFESSIONAL SUMMARY

Cybersecurity and Digital Forensics graduate from Murdoch University Dubai with demonstrated hands-on experience across vulnerability research, digital investigations, and full-stack application development. Credentialed through the ISC2 Cybersecurity (CC) program and endorsed as a Cisco Ethical Hacker, proficient in Python, Java, C, C++, and SQL with working expertise in Autopsy, Magnet AXIOM, and OSForensics. Seeking an entry-level role in software engineering or cybersecurity within the UAE where analytical thinking, strong technical fundamentals, and a proactive learning mindset translate directly into measurable impact for growth-stage and enterprise teams.

TECHNICAL SKILLS

Programming and Development: Python, Java, C, C++, Oracle SQL, HTML, CSS, Git, GitHub, Object Oriented Programming, Software Development Life Cycle, Agile, Version Control

Cybersecurity: Vulnerability Assessment, CVE Research and Exploitation, Ethical Hacking, Penetration Testing, Incident Response, Network Security, Access Control, Risk Mitigation, Security Operations

Digital Forensics: Magnet AXIOM, OSForensics, Autopsy, Evidence Acquisition, Chain of Custody, Mobile and Computer Forensics, Cyber Investigation

Systems and Tools: Kali Linux, Ubuntu, Windows 10/11, Windows Server, Oracle VirtualBox, VMware, Microsoft 365, Power BI, Oracle SQL Developer

WORK EXPERIENCE

IT Support Intern

June 2024 - August 2024

GetMax DMCC Global System Integrator

Dubai, UAE

- Delivered Tier 1 and Tier 2 technical support to enterprise clients on Microsoft 365 applications including Outlook, Teams, SharePoint, and OneDrive across a 3-month full-time engagement, consistently resolving tickets within agreed service windows.
- Diagnosed and remediated account, licensing, and application configuration issues, logging recurring fixes into an internal knowledge base to accelerate future resolution cycles.
- Completed 15+ structured Microsoft Learning pathways covering cloud productivity, identity management, and endpoint administration, broadening technical coverage across core enterprise services.

PROJECTS

Vulnerability Detection and Mitigation | CVE Research, Exploit Development, Patch Analysis

- Independently investigated, exploited, and catalogued 2 real-world CVE entries within a controlled lab environment to pinpoint root causes and realistic attack vectors.
- Engineered layered mitigation strategies spanning patch management, secure configuration, and compensating controls, and delivered findings through a formal technical briefing to a mixed technical audience.

Cyber Forensics Investigation | Magnet AXIOM, OSForensics, Autopsy

- Spearheaded an end-to-end digital forensic investigation across computer and mobile evidence, adhering to industry-standard evidence handling and chain-of-custody procedures.
- Acquired, preserved, and analysed artefacts spanning file system, browser, and communications data to identify suspects and reconstruct the activity timeline in a formal forensic report.

Ridesharing Mobile Application (Capstone) | Mobile Development, Agile, QA

- Contributed as core developer in a 4-person Agile team delivering a full-stack ridesharing mobile application for a Sharjah-based client over a 12-week capstone cycle, from requirements gathering through user acceptance testing.
- Architected user experience flow and functional test case coverage, applying SDLC best practices, version control, and formal technical deliverables throughout the delivery lifecycle.

Additional Projects | Python, Power BI

- Built a Python CLI Todo application with full CRUD operations (github.com/mukultekwani/my-todo-app) and authored an interactive Power BI analytics dashboard visualising global Sustainable Development Goal 9 trends.

EDUCATION

Murdoch University Dubai

Bachelor of Information Technology in Cybersecurity and Forensics

Dubai, UAE

January 2021 - December 2025

Gulf Asian English School

High School Diploma, Computer Science (Grades 11 and 12)

Sharjah, UAE

April 2018 - April 2020

CERTIFICATIONS

- Certified in Cybersecurity (CC), ISC2 | Ethical Hacker, Cisco Networking Academy | Introduction to Critical Infrastructure Protection
